DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a method for forming a textile, classified in class 162, subclass 358.5.
 - II. Claims 22-25, drawn to a device for spirally winding a system of yarns, classified in class 428, subclass 195.1.
 - III. Claims 26-56, drawn to a textile, classified in class 442, subclass 414.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus or by hand for layering 2 networks of fibers.
3. Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as spools of yarn or thread and the product as claimed can be made by another materially different process such as weaving.

Art Unit: 1751

4. Because these inventions are distinct for the reasons given above and the search required for Group II-III is not required for Group I, restriction for examination purposes as indicated is proper.

5. A telephone call was not made to the attorney to request an oral election because of the complexity of the restriction of the 56 claims drawn to a method, device, and a product. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
